Dear Professor Topa:

We very much regret to inform you that your manuscript was found unsuitable
for publication in Journal of Approximation Theory.

We were advised as follows.

%%
This is a beautiful paper but it is not approximation {\bf theory}. JAT
wants theorems and proofs.

NOTE. You misspell Sz\'az ("z" ===> "sz")
%%

We know that you'd prefer a more elaborate explanation but we thought that it
is more efficient if we tell you right now that we won't be able to accept
your submission instead of waiting for more details that may or may not come
in the near future.

The Journal is devoted to pure and applied approximation theory and related
areas. We think that your manuscript does not meet these criteria and, in our
opinion, the focus of your manuscript lies elsewhere. Therefore, we recommend
that you submit it to a more appropriate journal.

Sincerely,
Paul Nevai and Amos Ron
Editors-in-Chief
